Team Decisive
SDC Hackathon 2026

Plans evolve. Progress stays.

A reviewable reskilling workspace
for workers, employers and advisers.

What changes

Your next learning priority.

What stays

The progress you've already made.

Advance with every shift.

The problem is choosing what to learn next

Fictional sample profile

Siti Rosli

Operations coordinator

- Spreadsheet reporting
- Supplier coordination
- Document processing

5 reviewed skills · Explore a new direction

4h learning per week

Demo preference

What should I learn next, and what would make me change that decision?

Time is limited. Assumptions can change. A worker and adviser need a reason to choose—and to reconsider.

A reviewable reskilling workspace

Every stage leaves something workers and teams can inspect.

01 → **Review experience**
5 reviewed skills

02 → **Compare directions**
6 authored roles

03 → **Inspect evidence**
Dated source receipt

04 → **Build a plan**
Gaps + prerequisites

05 → **Review a change**
Accept or revert

06 → **Retain learning**
Same completed step

A new priority can build on the work already done.

Worker progress stays recorded. Employers can plan learning cohorts.

Keep the learning.
Revisit the decision.

Every match has a reason

Selected direction · captured result

Financial data analyst

60.68 / 100
Match index

Rank 3 of 6 · Steady adoption

2 of 5 required skills declared

Spreadsheets & reporting · Stakeholder communication

Scoring weights

18 + 30 + 12.68 = **60.68 index points**

45% Declared required skills

40 × 45% = 18.00 points

30% Transferable strengths

100 × 30% = 30.00 points

25% Research + scenario context

50.7 × 25% = 12.68 points

Gaps to review: data quality, analytics and SQL. **The match is an index, not an employment probability.**

The source behind the signal

Retrieved metadata is the receipt.
Nexus owns the planning assumption.

Oxford University Press · DOI 10.1093/haschl/qxag295 →

Authored Nexus mapping

`validat`

Metadata keyword

→ Review data reliability and human validation

1.04× Data quality & validation factor

A planning assumption,
not a published paper finding.

Research context does not establish Malaysian hiring demand.

Metadata retrieval does not verify quality. A refresh can leave inputs and ranking unchanged.

Review a plan → Complete a step → Compare a scenario → Accept or keep the previous view

A plan you can act on

Next step · accepted Faster AI adoption plan

Practise SQL & data querying

Prerequisite: spreadsheets, already declared.

Public resource · Microsoft Learn

Query and modify data with Transact-SQL →

Free public content · Work at your own pace

What Siti will have to show

Write and explain queries, joins and checks on synthetic tables.

16h 4 hours/week
Weeks 1–4

Weeks 5–8
Analytics practice

Weeks 9–10
Work sample + review

40 estimated hours remain
10 weeks after the demo completion.

The real career brief carries the plan, sources and progress.

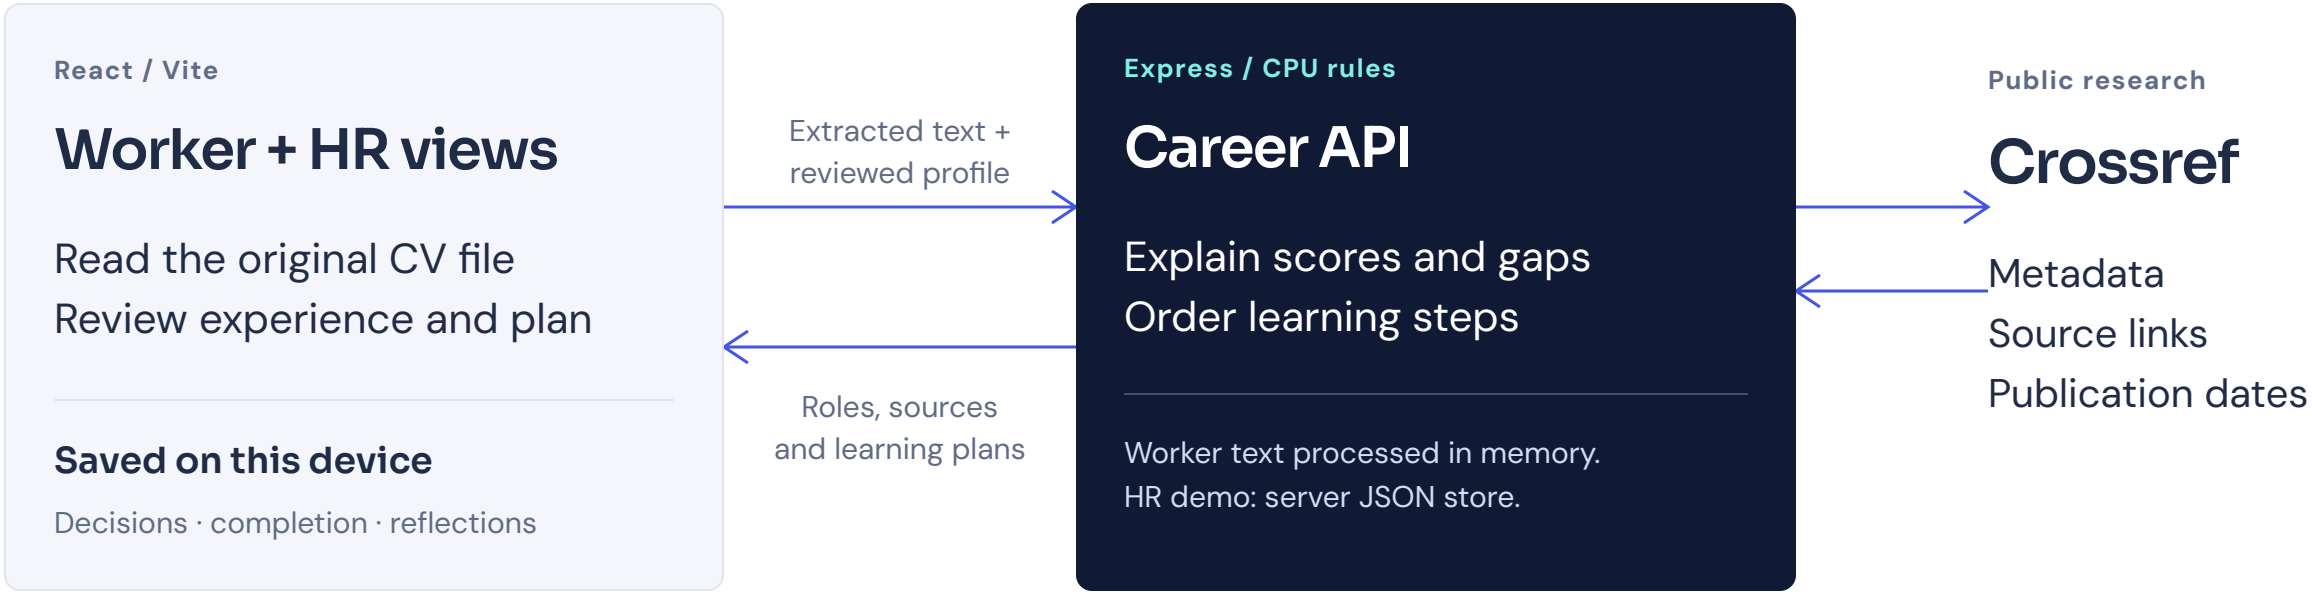

Download Siti's brief ↓

SDG 4.4: relevant technical skills through reviewed practice. Intended contribution, not measured impact.

Public content is free; optional certificates, equipment and other costs may apply. Introductory practice is not a qualification.

From CV to decision, with explainable rules

Hosted on Replit.
Worker progress stays on the device.

Implemented baseline

Explainable rules. No active LLM or GPU.

Next validation

Adviser matching quality + Malaysian demand relevance.

Engineering checks do not establish forecast accuracy, general fairness or employment outcomes.

From employee skills to a team learning plan

Explore HR & Employers ↗

01 · Invite

Share a survey

Expiry + response quota.
Immediate personal pathways.

02 · Understand

Review team skills

Radar, heatmap + profiles.
Compare authored scenarios.

03 · Plan

Build learning cohorts

Respect prerequisites.
Export a cited team brief.

Synthetic demo only

No employer login. Single-process server JSON store.
Prepare human review; never automate personnel decisions.

Expected impact · proposed pilot

Clearer next steps for teams.

Measure agreed actions, source validity, revision usefulness and practice work.

Baselines and subscription pricing unvalidated.
