SDC Hackathon 2026

Plans evolve. Progress stays.

A reviewable reskilling workspace
for workers and career advisers.

Advance with every shift.

What changes

Your next learning priority.

What stays

The progress you've already made.

The problem is choosing what to learn next

Fictional sample profile

Siti Rosli

Operations coordinator

- Spreadsheet reporting
- Supplier coordination
- Document processing

5 reviewed skills · Explore a new direction

4h learning per week

Demo preference

What should I learn next, and what would make me change that decision?

Time is limited. Assumptions can change. A worker and adviser need a reason to choose—and to reconsider.

A reviewable reskilling workspace

Every stage leaves something a worker and adviser can inspect.

01 → **Review experience**
5 reviewed skills

02 → **Compare directions**
6 authored roles

03 → **Inspect evidence**
Dated source receipt

04 → **Build a plan**
Gaps + prerequisites

05 → **Review a change**
Accept or revert

06 → **Retain learning**
Same completed step

A new priority can build on the work already done.

Completed learning stays recorded across accepted revisions.

Keep the learning.
Revisit the decision.

Every match has a reason

Selected direction · captured result

Financial data analyst

60.68 / 100
Match index

Rank 3 of 6 · Steady adoption

2 of 5 required skills declared

Spreadsheets & reporting · Stakeholder communication

Scoring weights

18 + 30 + 12.68 = **60.68 index points**

45% Declared required skills

40 × 45% = 18.00 points

30% Transferable strengths

100 × 30% = 30.00 points

25% Research + scenario context

50.7 × 25% = 12.68 points

Gaps to review: data quality, analytics and SQL. **The match is an index, not an employment probability.**

The source behind the signal

Retrieved metadata is the receipt.
Nexus owns the planning assumption.

Oxford University Press · DOI 10.1093/haschl/qxag295 →

Authored Nexus mapping

`validat`

Metadata keyword

→ Review data reliability and human validation

1.04× Data quality & validation factor

A planning assumption,
not a published paper finding.

Research context does not establish Malaysian hiring demand.

Metadata retrieval does not verify quality. A refresh can leave inputs and ranking unchanged.

Review a plan → Complete a step → Compare a scenario → Accept or keep the previous view

A plan you can act on

Next step · accepted Faster AI adoption plan

Practise SQL & data querying

Prerequisite: spreadsheets, already declared.

Public resource · Microsoft Learn

Query and modify data with Transact-SQL →

Free public content · Work at your own pace

What Siti will have to show

Write and explain queries, joins and checks on synthetic tables.

16h 4 hours/week
Weeks 1–4

Weeks 5–8
Analytics practice

Weeks 9–10
Work sample + review

40 estimated hours remain
10 weeks after the demo completion.

The real career brief carries the plan, sources and progress.

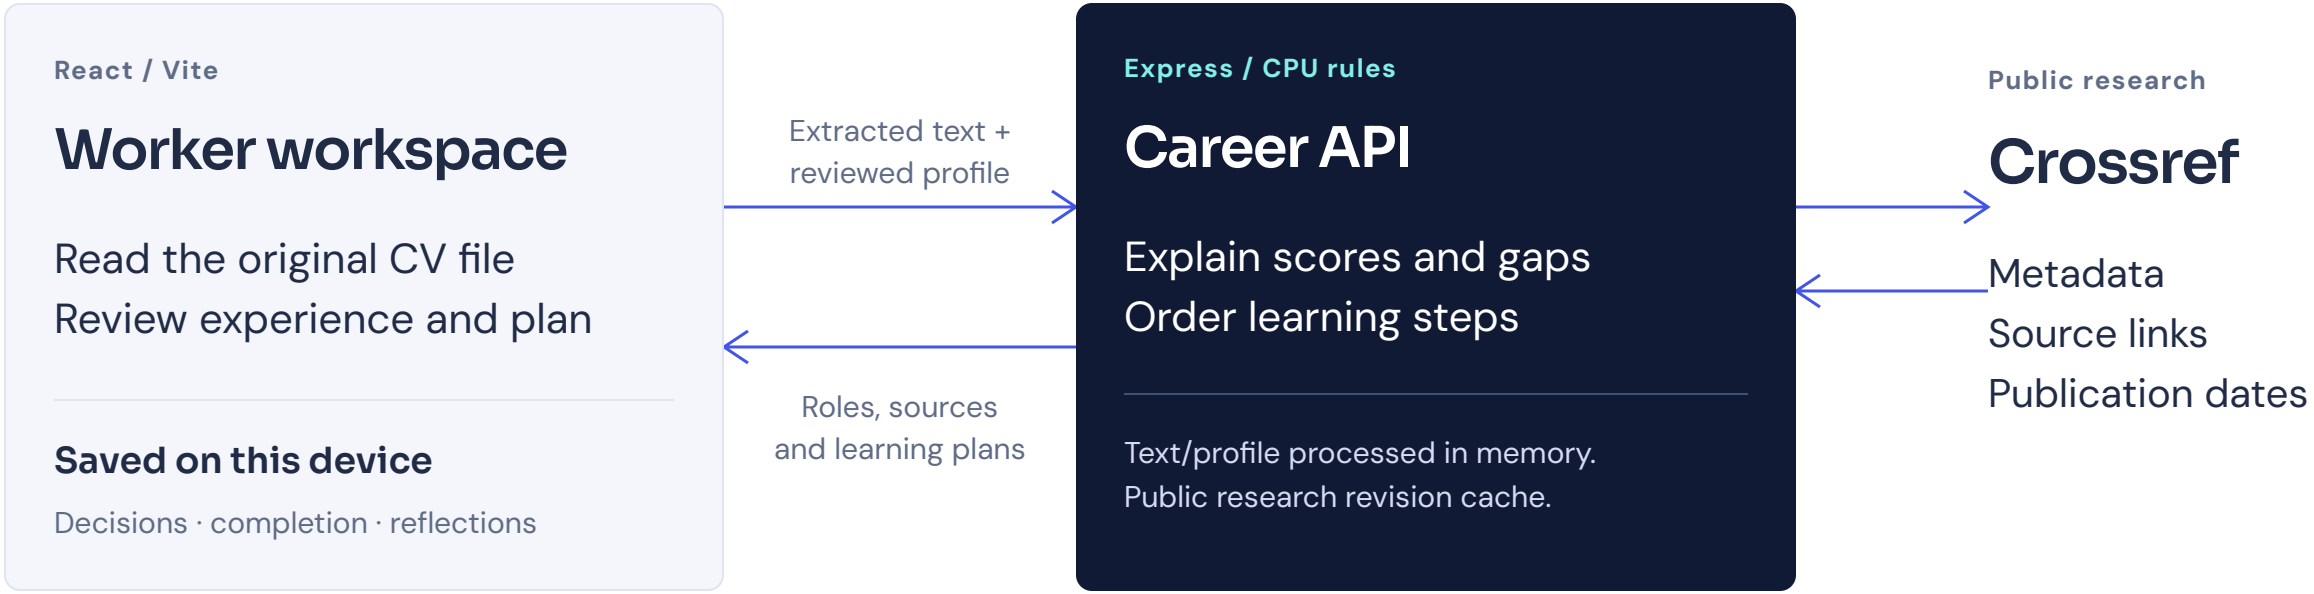

Download Siti's brief ↓

SDG 4.4: relevant technical skills through reviewed practice. Intended contribution, not measured impact.

Public content is free; optional certificates, equipment and other costs may apply. Introductory practice is not a qualification.

From CV to decision, with explainable rules

Original files stay in the browser.
Saved work stays on this device.

Implemented baseline

Explainable rules. No active LLM or GPU.

Next validation

Adviser matching quality + Malaysian demand relevance.

Engineering checks do not establish forecast accuracy, general fairness or employment outcomes.

Expected impact, measured in a pilot

Expected benefits to test

Intended benefits · baselines pending

Intended benefit	Proposed pilot measure
Clearer next steps	Time to an adviser-agreed action
Traceable advice	Validity of each source used
Useful revisions	Why a change was accepted or reverted
Visible learning	Adviser review of a work sample

Expected benefits, not measured outcomes. No employment or impact results are claimed.

Proposed scope

One adviser team.
Two review sessions.

For workers and advisers

A clearer next step.
A decision worth revisiting.

Keep useful learning while reviewing a new direction.

Buyer hypothesis

Malaysian career centres
& reskilling providers.

Subscription per active advised learner.
Pricing remains to validate.
